2. [MAKE A LOGO](#) (COOL TEXT EFFECTS, thousands of possibilities, make sigs/headers)
52. [Make Your Own Sign Generator](#)! Just find or take a picture where someone or product has a text area that can be cleared out (using [GIMP](#) freeware photo editor) & then import the photo to our "Sign Generator Maker", here's a visitor's creation [HERE](#) as a sample or see the uploaded photos [HERE](#) (over 500 templates). "The Stamper", 500+ larger img templates to personalize, many new samples below, you can even import your own 650X650 maximum sized pixel photo URLs so you can add cartoon caption [bubbles](#) or make your own sign generators. There are about 100 samples below in the single template section to show it's power, new singles are definitely samples.

## STILL WANT MORE?

[www.mashUPphotos.com](http://www.mashUPphotos.com) has even more image making sites you can use (some sites are listed from this ebook) to create copyfree graphics incase you are not quite satisfied with the list we have provided in this free ebook. Here you will find mostly photo editors and photograph effect mash-ups adding web tools (there are a few sign generators too).

A mashup is a digital media file containing text, graphics, audio, video and/or animation drawn from pre-existing sources, to create a new derivative work. Mashups represent a new phase in the re-use of existing works...
